Notice:
**Informal Stakeholder Workshops,
Oral Proceedings, Public Hearings
Fourth Quarter 2004**

Maricopa County Environmental Services Department, Air Quality Division, will conduct Informal Stakeholder Workshops, Oral Proceedings, and Public Hearings regarding the Maricopa County Air Pollution Control Regulations according to the schedule provided in this notice. If the information in this notice changes, the change(s) will be announced on the Internet (at the web site address listed below) and on Maricopa County's Workshop Update Line (listed below).

All **Workshops** and **Oral Proceedings** will be held at 1001 North Central Avenue, Phoenix, Arizona, **Room 560** unless otherwise noted. Draft rules may be picked up at 1001 North Central Avenue, **Suite #695**, Phoenix, Arizona, or on the web at <http://www.maricopa.gov/envsvc/air/workshops.asp>. For current information on workshop times and locations, call our Workshop Update Line at **(602) 506-0169**. For questions or additional information, call the contact person listed or **(602) 506-7396**.

Public Hearings are held at: Maricopa County Board of Supervisors' Auditorium
205 West Jefferson Street, Phoenix, Arizona

For rules going to Public Hearing, a summary of the proposed action, a summary of comments and departmental responses, and a demonstration of compliance with A.R.S. 49 Subpart 112 A or 112 B will be available along with the draft rules at 1001 North Central Avenue, **Suite #695**, Phoenix, Arizona.

Rules are effective as of the date of approval by the Board of Supervisors unless an effective date for certain revisions is otherwise noted within the text of the rule.

A sign language interpreter, alternative form materials, or infrared assistive listening devices will be made available at the Public Workshops and Hearings upon request with 72 hours notice. Additional reasonable accommodations will be made available to the extent possible within the time frame of the request. Requests should be made to (602) 506-4057.

RULE SUMMARIES FOR INFORMAL STAKEHOLDER WORKSHOPS

Application For Dust Control Permit & Guidance

Maricopa County is revising the "Application For An Earthmoving Permit" and the "Guidance For Filling-Out An Application For An Earthmoving Permit". Changes include changing the name "Application For An Earthmoving Permit" to "Application For A Dust Control Permit", changing the name "Guidance For Filling-Out An Application For An Earthmoving Permit" to "Guidance For Application For Dust Control Permit", adding details and explanations for all the information required in the Application For A Dust Control Permit, describing control measures necessary to meet the requirements under Rule 310 (Fugitive Dust), and describing soil types necessary to meet the requirements under new Appendix F (Soil Designations). To date, Maricopa County has conducted seven Public Workshops to discuss these changes - January 29, February 10, February 24, March 16, March 30, April 22, and June 24, 2004.

Rule 280 Fees

Maricopa County will propose to amend Rule 280 in order to update fees to account for the loss of grant monies. Grant monies established by Arizona Revised Statutes (A.R.S.) §49-551 were relied upon during the 2002 workload analysis and fee revisions; however, these grant monies have not been appropriated by the legislature for the past 2 years. In addition, fees will be updated to reflect increased indirect costs.

Rule 316 Nonmetallic Mineral Processing

Maricopa County is proposing to amend Rule 316 in order to address Best Available Control Measures (BACM) and Most Stringent Measures (MSM) proposed in the Salt River PM₁₀ State Implementation Plan Revision.

RULE SUMMARIES FOR ORAL PROCEEDINGS

Rule 310.01 Fugitive Dust From Open Areas, Vacant Lots, Unpaved Parking Lots, And Unpaved Roads

Maricopa County is proposing to amend Rule 310.01 in order to address Best Available Control Measures (BACM) and Most Stringent Measures (MSM) proposed in the Salt River PM₁₀ State Implementation Plan Revision.

RULE SUMMARIES FOR ORAL PROCEEDINGS

Rule 316 Nonmetallic Mineral Processing

Maricopa County is proposing to amend Rule 316 in order to address Best Available Control Measures (BACM) and Most Stringent Measures (MSM) proposed in the Salt River PM₁₀ State Implementation Plan Revision.

Rule 325 Brick And Structural Clay Products Manufacturing (BSCP)

An oral proceeding will be held on December 9, 2004 at 9:00 a.m. in Room 560 for new Rule 325 (Brick And Structural Clay Products Manufacturing (BSCP)). The new rule is being proposed in order to regulate particulate matter emissions from brick and clay structural product manufacturing implementing Best Available Control Measures (BACM) and Most Stringent Measures (MSM) proposed in the Salt River PM₁₀ State Implementation Plan (SIP).

Rule 358 Polystyrene Foam Operations

Historically the Maricopa County Air Pollution Control Regulations have not contained a source-specific rule to address pollutants from polystyrene foam operations. New proposed Rule 358 will address volatile organic carbon (VOC) emissions that are emitted from the manufacture of expanded-polystyrene (EPS) foam products. Section 182(a)(2)(A) of the Clean Air Act requires that Reasonable Available Control Technology (RACT) be applied in ozone nonattainment areas to each stationary facility that is a major source of VOC emissions. Maricopa County contains an ozone nonattainment area previously classified as "serious" under the former "one-hour" standard. The area is now classified as "basic" under the current 8-hour standard. Maricopa County has identified four facilities that expand polystyrene (EPS) to make foam products, each of whose uncontrolled VOC emissions exceed the major source threshold, 50 tons per year. New proposed Rule 358 will require these facilities to choose from specific reasonably available control technologies, while taking into account factors unique to Maricopa County.

RULE SUMMARY FOR PUBLIC HEARING

Rule 314 Open Outdoor Fires

Amended Rule 314 is scheduled to be adopted by the Board Of Supervisors on December 15, 2004. The open burning rule was amended to make it conform with the EPA's requirements for the State Of Arizona's Regional Haze State Implementation Plan (SIP). The major revisions proposed in the rule add recordkeeping requirements and also include technical changes to improve the rule's clarity. The revisions to the Maricopa County open burning rule must also continue to implement best available control measures (BACM), as required by the Clean Air Act for serious PM₁₀ nonattainment areas.
